PROJECTS

Lowest Cost Smart Board — *Built using IR tracker*

Develop a state-of-the-art Smart Board system that revolutionizes classroom interaction. Our innovative solution incorporates an IR pen and IR glove to facilitate seamless communication between students and teachers. One of the main advantages is its ability to transform any flat surface into a dynamic and interactive whiteboard, providing an unparalleled learning experience.

Car Dealer Website — *Built using HTML & CSS*

Developed a car dealer website which allows the user to browse and search for vehicles, view vehicles detailed information.
